

Marlow then Surge Milking Machines

The first milking machines that I recall were Marlow's. Pa bought the 1947 model milkers and the necessary compressor.

The Marlow milker got its name from the designer J.C. Marlow.

The Marlow factory was in Mankato, MN.

I found a 1947 ad that Pa surely read long ago.

HOARD'S DAIRYMAN 825

Are you SATISFIED?

with "MODEL T" MILKING METHODS

35 YEARS...

Of intensive, practical experience and research made possible the design and development of the Milker that is MODERN in 1947, not in 1917 or 1927.

THE TRULY MODERN

MARLOW MILKER

J. C. MARLOW, one of the earliest milker pioneers sold and serviced milkers in a "Model T". Advocated "FAST MILKING" 15 years ago. Was the "FIRST" to prove only 10 inches of vacuum best in 1938. IS AGAIN "FIRST" IN 1947 WITH THE MOST SANITARY MILKER EVER BUILT.

J. C. MARLOW

the MARLOW MILKER, modern in every detail of SANITATION, PERFORMANCE and APPEARANCE.

For UP-TO-DATE milking results with

- NO UDDER IRRITATION
- NO TUG AND PULL
- NO HOLDING DOWN
- NO SANITATION DEFECTS
- NO STRAPS OR STRINGS

Let the MODERN MARLOW MILKER prove itself on your herd.

For more profit, replace your obsolete milking equipment with a NEW, MODERN MARLOW MILKER.

Pa switched the more popular Surge milking machines by 1955. There was a Surge dealer in Elk River.

Pa had me store the Marlows above the 1949-50 milk room, where they stayed several decades.

Jim recalled that Pa brought one Marlow milker back into service for use with cows whose udder hung too low for the Surge machines.

Pa's two Marlows are now in our farm museum.

After I left home Pa got a pipeline system but milked with the Surge machines.
